Credit Card Approval Prediction — Problem Statements:

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A bank credit analyst reviewing loan applications	Quickly screen hundreds of credit card applications and flag high-risk applicants	Manual review is slow, inconsistent, and error-prone at scale	Banks lack an automated system that uses applicant financial data to predict credit risk	Overwhelmed, frustrated, and concerned about missing risky applicants
PS-2	A prospective customer applying for a credit card	Know my chances of approval before submitting a formal application	I have no way to check eligibility in advance and often get rejected unexpectedly	There is no self-service tool that predicts approval likelihood based on my financial profile	Anxious, discouraged, and unprepared for rejection
